

Cookies policy

Notice on the use of cookies

Reference to 'spletna stran Milan Krajnc', is understood in this document as Milan Krajnc (MK) - NCC LABORATORIJ d.o.o. , both have headquartered Čušnja vas 43, Trebelno, SI

What are cookies?

Cookies are small text files created by websites during a visit and which download onto your computer, smartphone or other device when visiting a website and are used in a browser. Cookies are fundamental to providing user-friendly online services. The most common e-commerce functions would not be possible without cookies. Interaction between the user and the website is faster and simpler through the use of cookies. Due to the use of cookies, MK can provide users with relevant and interesting content and provide them with a pleasant user experience. Cookies enable the site to remember a user's preferences and experience, thus saving time, and browsing web pages is more efficient and user-friendly. Saving cookies is fully controlled by a user's browser – users can thus limit or disable cookies if desired. Cookies are not harmful and are always time-limited.

Concrete examples of the use of cookies:

- for a better user experience, the website adjusts content to users based on past visits
- in the areas of the website where registration is required, users stay signed in
- to identify the user's device that allows the content of the device to be customised
- to monitor visits, which allows the effectiveness of the content to be checked, the suitability of ads, and the continuous improvement of the website
- they are essential for the operation of certain services (for example, cookies that are part of the system through which the website is created)

Cookies usually include:

- the name of the server from which the cookie was sent
- the lifespan of the cookie
- a value that is usually a randomly generated unique number

Domain cookies are set up with the website's domain in the address bar, the cookies of other sites are from other domain sources that have different elements embedded in the page, such as ads or images. Cookies can be set by the website on which the user is located (own cookies) or a third-party that manages that content on the website that the user looks at (cookies from elsewhere). Cookies can be stored for various lengths of time, i.e. only for the duration of the

browsing session, or for a longer period of time. A temporary or session cookie is a cookie that allows MK to connect a user's actions during a session in the browser. The session in the browser starts when the user opens the browser window, and ends when it closes it. Session cookies are created temporarily and are deleted when a user closes the browser window. Permanent or stored cookies are cookies that remain stored on a user's device. These cookies are activated every time a user visits a website that created this actual cookie.

What cookies does the Milan Krajnc (MK) website use?

- **Essential cookies:** These cookies are essential, as they allow you to navigate through the website and use its functions and/or offer the required service. MK does not need users' permission to use these cookies, therefore they are permanently installed on the device. They are set when a user performs any interaction with the website.
- **Web analytics cookies:** These cookies help Milan Krajnc (MK) - NCC LABORATORIJ d.o.o. understand how users use its web pages. These cookies help MK improve user experience and help meet users requirements and trends. MK only uses these cookies if the user agrees to their use.
- **Target cookies or third-party advertising cookies:** These cookies are used to deliver ads that are tailored to the user and their interests. They are also used to limit the number of displays of each ad as well as to help measure the performance of the advertising campaign. They are usually installed by advertising networks with the permission of the website manager. They remember that the user has visited the website and this information is forwarded to other organisations such as advertisers. Targeted or advertising cookies are often associated with the functionality of a website that is provided by another organisation. They also include cookies of social networks (Twitter, Facebook or Google).

The table below shows the cookies used by the MK website:

1. Essential cookies

Service	Name of the cookie	Length of storage in the browser	Description	Manager
.milankrajnc.com or .si	SESS_	20 days	Session cookies, which are part of the Drupal system, are assigned to a user when visiting the website and enable operation of the system.	Milan Krajnc (MK) - NCC LABORATORIJ d.o.o.
.milankrajnc.	simple_cookie_control	1 year	These cookies are used to	Milan Krajnc

com or .si			retain information about settings linked to the use of cookies on the page.	(MK) - NCC LABORATOR IJ d.o.o.
.milankrajnc.com or .siemka	milankrajnc_session	Session	Session cookies store the identification number of the session	Milan Krajnc (MK) - NCC LABORATOR IJ d.o.o.
.youtube.com	Demographics ACTIVITY use_hitbox PREF VISITOR_INFO1_LIVE YSC	6 months Session 10 years 8 months 6 months Session	The website contains embedded YouTube video content with advanced privacy mode. This method does not install cookies until the user presses the play button. When the user starts playing the video content, YouTube can install a cookie, but the obtained data do not disclose the user's private data.	Google
.riddle.com	SID	session	These cookies are used for the purpose of monitoring the current progress with the Riddle quiz.	Riddle

	AW-957707363	2 years		
.google.com	OTZ	1 month	Google analytical cookie used for traffic information on the website.	Google
.google.com	NID	6 months	Google cookie designed for advertising outside of Google websites.	Google
.google.com	1P_JAR	1 month	This cookie contains information on how the end user uses the site, and any advertising that the end user may have seen before visiting the said website.	Google
.google.com	CONSENT	20 years	This cookie contains information on how the end user uses the site, and any advertising that the end user may have seen before visiting the said website.	Google
.doubleclick.net	RUL	1 year	This cookie is used to determine whether the ad on the site was properly displayed. This is done to ensure that marketing campaigns are more effective.	Google
.doubleclick.net	DSID	1 year	This cookie is used to display targeted ads that are important for users online. Based on previous visits to this site, it can display targeted ads. For example, ads on the topic in which a user has previously expressed interest while browsing the	Google

			<p>Milan Krajnc (MK) website can be displayed online. In addition, these cookies measure the degree of conversion of advertisements presented to users.</p>	
.doubleclick.net	IDE	1 year	<p>This cookie is used to register and report on the actions of the user of the website after viewing or clicking on one of an advertiser's ads in order to measure the performance of the ad and to display targeted ads to the user.</p>	Google
.emarsys.com	scarab.visitor	1 year	<p>This cookie that stores the visitor id which will identify the visitor through sessions.</p>	Emarsys
.emarsys.com	cdv	1 year	<p>This is the 3rd-party version of scarab.visitor. It stores a server side generated visitor id to identify the same visitors through different sessions. It provides the capability to identify a visitor as a known user even if no identification event has taken place. If this cookie is blocked, the user cannot be identified without an identification event.</p>	Emarsys
.emarsys.com	scarab.profile	1 year	<p>This cookie stores user profile information, products the user browsed, etc. It also stores performance metrics about our scripts, load times, execution times, and so on after being generated by the first event (go command). The information stored in this cookie is encrypted. This cookie is only present if the xp cookie is blocked.</p>	Emarsys
.emarsys.com	xp	1 year	<p>This is the 3rd-party version of the first party cookie scarab.profile. It is set from the first party version. It contains user profile data in a serialized, encrypted format. The data is covering events, such as, item view, category view and searches. If this cookie is blocked, the personal recommendation feature for visitors will not be available.</p>	Emarsys
.emarsys.com	scarab.mayAdd scarab.mayViewed	Session	<p>These are the session cookies that are used for click and add-to-cart tracking. When a user clicks on a recommended item, and there is not</p>	Emarsys

enough time to report the click to our server (to avoid blocking the user flow), the click information is stored in a cookie. The next time the script loads in the same browser, these cookies are read and the data is sent to our servers.

This is a 3rd-party cookie used for similar purposes as scarab.mayAdd and scarab.mayViewed. It stores a server side generated session id for session length identification. If this cookie is blocked, the visitors session lengths are estimated by event timestamps.

.emarsys.com	s	Session		Emarsys
.emarsys.com	fc	30 minutes	Force cohort cookie: It is used for A/B testing.	Emarsys

On the website, users can find links to other sites that are not under the management of MK. In order to respect privacy or the content of these sites, Milan Krajnc (MK) - NCC LABORATORIJ d.o.o. does not take responsibility for the content of these sites or for the privacy of user data, it simply offers visitors links through which they can obtain useful information.

Note: articles published on this website may also occasionally contain content from foreign sites (embedded video). This means that from a technical point of view, when visiting milankrajnc.com or milankrajnc.si users are provided with content from third parties (e.g. YouTube), which includes users' own ad systems by which users install their own cookies, which are used for their own purposes, over which Milan Krajnc (MK) - NCC LABORATORIJ d.o.o. has no control.

In the same way, the Facebook, Google+ and Twitter social networks will install cookies on users devices based on whether or not they are logged into their service. The management of their cookies is regulated by the terms of cooperation which users of the milankrajnc.com and.si website, as users of these networks, accept when registering in these social networks.

Cookie control settings

There are several ways to manage and control a user's cookie settings. By deleting or blocking cookies, the website will not work properly or equally effectively. If a user deletes all the cookies, their preferences will not be saved and they will receive a cookie notification every time they visit this website. Most modern web browsers offer users general information about cookies and allow users to view all the loaded cookies and allow them to delete all or individual cookies, and allow them to block or allow cookies for all websites or individually selected websites. Users can also normally exclude individual advertising cookies of third

parties. If a user changes the cookie settings in their web browser, unless they delete or block each cookie separately, the changes apply to all websites that they visit, not only for those websites that are managed by Milan Krajnc (MK) - NCC LABORATORIJ d.o.o.. Cookie information is usually located in the 'Help' section in web browsers.

You can control and change the cookie settings in your web browser.
For information on cookie settings, select the web browser you are using.
